---

Dear Jennifer,

Thanks for sending the "Notice of Pesticide Reregistration" for the bromadiolone based products.

I left you a voice mail message but thought I would send this to you in the meantime. My concern is the reference to 12 months for product with existing labels. Before I submitted for any amendments, I specifically asked the question regarding existing stocks. The following e-mail from the EPA answered my question stating that product with existing labels can be released for shipment until June 4, 2011 as stated in the mitigation decision.

You sent me 2 notices for CONTRAC All-Weather Blox Reg. No. 12455-79. One has two holes punched in the top which I presume is your copy. Do you want me to return this to you?

Also, I did not receive a notice for Contrac Rodenticide Reg. No. 12455-69. This was submitted the same time as the others. Do you have this?

I look forward to hearing back from you.

Best regards,

John Lublinkhof

Good Afternoon John,

I can confirm you will be allowed to sell/release rodenticide products with the old (pre-mitigation) label until June 4, 2011, even after amended (mitigation compliant) labels have been submitted and approved.

Regards,

Mitigation -Release for Shipment

Dear Rusty,

Good Morning!

We are about ready to start submitting amendment requests for a number of products to conform with the mitigation decision requirements. I know

this isn't due until Dec. 2009 but we would like to get started early. The question is about the last date of "release for shipment." I know amendments in the past allowed for 18 months to sell out the old stock. If we should submit for an amendment now and if approved, will we be able to sell out product (with existing label text) from our manufacturing facility through the June 4, 2011 last day for "release for shipment" date which is still over 2 1/2 years away.?

Please clarify this point?

Many thanks,

John Lublinkhof, Ph.D.
